

## Connectorization services

Along with our industry's most complete line of cables for elevators, Draka is pleased to offer the widest possible range of connectorization services for those cables.

Connectorization can be performed on any cable, from single wires to complex harnesses. Provide us with your diagrams and Draka Elevator products will fit hoistway cables, travelling cables and stationary wiring with modular connectors that simply snap into place. We also offer cut-to-length cables and ropes, provide stripped cables and custom assemble inspection and pendant stations.

Draka Elevator engineered solutions ensure that cables and harnesses are quickly, easily and accurately installed. Color-coded connectors

assure positive circuit identification. All connectorized cable products are 100% post-fabrication tested for total customer satisfaction.

Call 1-877-DRAKA-EP (877-372-5237) for more information on cable connectorization for elevators.
