</tbody>
</table>

The Micelect RTS (Rope Tensioning System) is a portable tool for quickly and accurately measuring the tension of elevator wire ropes. Rope tensions are quickly displayed on a backlit LCD screen.

Operating the RTS is simple: Small sensors are attached to each wire rope using the supplied T-handle allen wrench. USB cables connect the sensors to the RTS control unit which displays rope tension in real time, allowing the tensions to be adjusted.

Pre- and post-adjustment values are stored in the RTS memory and can be downloaded to a PC for accurate record keeping.

Features
- Portable
- Readout in both pounds and kilograms
- Accurate to within 3%
- Can be used to measure both rope tension and weight of the car and counterweight
- Can measure up to 12 ropes at once with a maximum weight of 2400 lbs • 1200 kg per rope
- Both graphic and numeric displays
- Fits 1/6 to 5/8 in • 4 to 16 mm ropes
- Display languages include English, Spanish, German, Italian, French and Portuguese
- Comes with all cables, T-handled allen wrench and a hard-shell case
- Order only the sensors you need (minimum of 6, maximum of 12)
- Stores and downloads to PC pre- and post-tensioning values
- Low battery indicator
- Factory reset switch
