Guide rail alignment gauges

Part Number	Description
DRAKA-RAG-001	Rail alignment gauges, pair of clamp-style gauges, hard-shell case included

Draka's easy-to-use rail alignment gauges are the perfect tool for ensuring that your elevator guide rails are properly installed. Clamp the gauges to the rails directly across from each other (the clamps are adjustable depending on rail thickness). This straightens the alignment string like a plumb line. If you can see the line through the precisely-machined viewing holes, the rails are aligned. If you can't, then adjust the rails while the gauges are attached to confirm proper alignment.
