## Instrumentation Cable

XLPE insulation / 18 & 16 AWG / CPE jacket / 600 volt

### Applications

These single pair or triad instrumentation cables are constructed with heat and moisture resistant cross-linked polyethylene (XLPE) with an abrasion, oil, chemical and flame-resistant polyvinyl chloride (PVC), chlorinated polyethylene (CPE) or low smoke, zero halogen (LSZH/XLPO) jacket for use in utility substation or power generation facilities.

They are recommended for indoor or outdoor applications in conduit, duct, cable tray or aerial installations and NEC-compliant for continuous operation at 90°C in wet and dry locations.

### Features

#### 1. CONDUCTORS

Class B, soft drawn, bare copper per ASTM B3 and ASTM B8.

#### 2. INSULATION

Heat and moisture resistant, cross-linked polyethylene (XLP) meeting the requirements of NEMA WC57/ICEA S-73-532 and UL 66 & 1277. The insulation is suitable for use in wet or dry locations at a conductor temperature not exceeding 90°C for normal operation.

#### 3. CIRCUIT IDENTIFICATION

One black and one white insulated single conductor in each pair with printed pair numbers (black/white/red for triads).

#### 4. PAIR ASSEMBLY

Two insulated conductors twisted with a stranded tinned copper drain wire per ASTM B33 and wrapped with an aluminum foil/mylar shield and an isolation tape.

#### 5. CABLING

Required number of pairs are cabled with non-hygroscopic fillers where necessary to form a round compact core.

#### 6. OVERALL SHIELD/DRAIN WIRE

Helically applied aluminum foil/mylar tape. The drain is a stranded soft-drawn tinned copper per ASTM B33.

Optional constructions include:

Corrugated longitudinally-applied .005 or .008 copper shielding

Flat helically-applied .005 or .010 copper

Longitudinally-applied copper or aluminum copolymer-bonded shield

Copper braid (specify percentage of coverage for optimum EMI protection)

#### 7. JACKET

Abrasion, oil and chemical resistant and highly flame retardant polyvinyl chloride (PVC), chlorinated polyethylene (CPE) or low smoke, zero halogen (LSZH/XLPO) jacket to meet UL Standard 1277.

### Ratings

UL Sunlight Resistant

Oil resistant

### Optional Constructions

Tinned copper conductors

Flexible stranded conductors

PVC/Nylon or EPR insulation

PVC, CPE, LSZH and XLPO jacket compounds

300 volt rating

# Instrumentation Cable
