

PRESS RELEASE**PRYSMIAN GROUP ATTENDING SUBMARINE NETWORKS WORLD IN SINGAPORE****FOCUS ON THE MINISUB CABLE SYSTEM AND TURN-KEY SOLUTIONS
FOR THE TELECOM SUBMARINE CABLE SECTOR**

Milan, 7th September - Prysmian Group, world leader in the energy and telecom cable systems industry, will showcase its state-of-the-art range of products and services for the submarine telecoms industry developed by its business unit NSW at the 25th edition of Submarine Networks World, the world's leading annual submarine communications gathering, which will take place in Singapore on 7-8 September (Booth F06).

For the Group, Submarine Networks World 2022 will be a great opportunity to present its latest innovations to the customers and to showcase its leading market position as a one-stop-shop for the entire submarine telecommunication cable industry. The NSW plant in Nordenham, Germany has been manufacturing submarine cable since 1899 and makes advanced submarine cable products for both repeaterless and repeatered systems. The Group can therefore call on full expertise in submarine telecommunication connections and an extended ability to offer turnkey products and services including installation.

A special focus at Submarine Networks world 2022 will be dedicated to the high fiber count MINISUB 288 cable family, a rugged, compact fiber-optic repeaterless submarine cable with up to 288 fibres in a single central tube and multi-tube ultra-high fibre-count designs with up to 1728 fibres.

Prysmian Group executives will also highlight the NSW MINISUB® cable family, a rugged, compact fiber-optic repeatered submarine cable with unique features, such as high count of up to 48 powerful fibers, low conductor resistance of down to 0.6 Ω/km, installation in water depths up to 8,000 m and extraordinary operating voltage of 20 kV DC.

Prysmian Group's Ashutosh Bhargava, Projects Submarine Telecom Director, will be among the featured speakers at the event. "Our return to the submarine communications sector in 2019 has seen our market share steadily increase over the past four years as more online content and faster internet speeds have led to increasing demand higher bandwidth and therefore for submarine communications cables," said Ashutosh Bhargava. "The winning combination of our cables offering, and cutting-edge installation capabilities gives us a strong position in competing for turnkey projects."

Prysmian Group

Prysmian Group is world leader in the energy and telecom cable systems industry. With almost 150 years of experience, sales of over €12 billion, about 29,000 employees in over 50 countries and 108 plants, the Group is strongly positioned in high-tech markets and offers the widest possible range of products, services, technologies and know-how. It operates in the businesses of underground and submarine cables and systems for power transmission and distribution, of special cables for applications in many different industries and of medium and low voltage cables for the construction and infrastructure sectors. For the telecommunications industry, the Group manufactures cables and accessories for voice, video and data transmission, offering a comprehensive range of optical fibres, optical and copper cables and connectivity systems. Prysmian is a public company, listed on the Italian Stock Exchange in the FTSE MIB index.
